Website Vs Web APP Vs Web Service

- RPC - Remote Procedure CAll
- RMI - Remote Method Invocation

REST - Representational State Transfer

```
Representation / State / Transfer
        - World Wide WEB - Satisfies major five constraints
        - 5 Constraints
                $ Client - Server Architecture
                $ Stateless - Does not cache any state information
                $ Allow Client To Cache
                $ Layered Architecture
                $ URL should be a uniform interface
```

Soap - Communicaion based protocol

CRUD

- Create - POST
- Update - PUT
- Read - GET
- Delete - Delete
